Teacher profile higher education (HE)

This is a version of the Jisc ‘Six elements of digital capabilities’ (http://ji.sc/digicap_ind_frame) model, specifically designed for teachers in higher education (HE). No one individual will have all of the capabilities included in this profile; it is intended to demonstrate how new areas of practice are emerging, and how individuals might use their digital skills in different areas of their designated roles. It has been mapped to the UK Professional Standards Framework (UKPSF) (http://ji.sc/ukpsf_digital_lens).

The profile might be used in the following ways:

» Teaching staff might use the profile to review their own professional development needs, or to ensure their digital capabilities are fully recognised and credited eg in appraisal and review

» Academic managers, departmental leaders, appraisers and teaching observers might use the profile to work with a member of teaching staff and review their professional development needs, or ensure that their digital capabilities are fully recognised and credited

» Departments and course teams might use the profile to assess their collective strengths and weaknesses, and identify areas in which new skills need to be developed or recruited

» Staff and educational developers might use the profile to design development opportunities for groups of staff, for example by mapping elements of the framework to existing CPD programmes or to development resources and opportunities (workshops, online materials etc)

» Academic and digital leaders might use the profile as the basis for a locally specific version (eg faculty or school based), with language and examples relevant to local issues and digital needs

The profile is only intended as one example of how the six elements might be interpreted and implemented. It can be adapted to suit the needs of different professional staff working in different organisational settings. It is one of a number of profiles based on the ‘Six elements’ model, including a profile for learners. For more information on all profiles and other related resources please see the Building digital capability project page (http://ji.sc/building-digicap).

| Information, data and media literacies (critical use) | Maps to UKPSF: A4, K4 |
|-----------------------------------------------|
| **Information literacy** | Find, evaluate, manage, curate, organise and share digital content for learning, teaching and assessment.<br>Support learners in their use of content, including academic, professional and open content.<br>Interpret information for academic and professional purposes.<br>Know the rules of copyright and plagiarism and alternatives such as creative commons licensing; use appropriate referencing for digital materials and support learners to do the same.<br><br>**At higher levels:**<br>Critically assess digital information for its relevance to specific outcomes and groups of learners; develop a personal information environment; organise incoming information using eg filters, feeds, sort rules, advanced searches, curation tools. |
| **Data literacy** | Collate, manage, access and use digital data in spreadsheets and other media.<br>Record learner-related data in digital systems as required. Use data to support learning and progression of individual learners and to review teaching where appropriate.<br>Manage personal data securely.<br><br>**At higher levels:**<br>Interpret data by running queries, data analyses and reports; manage data relevant to the KPIs of a service, department or institution; share data for learning and teaching enhancement and scholarship.<br>Ensure data security and use legal, ethical and security guidelines in data collection and use.<br>Understand and critique the role of data in the subject area, and more widely in education, society and employment; understand the nature of algorithms. |
| **Media literacy** | Critically read and interpret messages in a range of digital media – text, graphical, video, animation, audio, etc.<br>Support learners in their use of digital media, enabling them to appreciate issues such as audience, purpose, accessibility, impact, modality.<br>Choose and use media resources suitable to students’ different learning needs; know how to access media and other content in alternative formats and understand what makes it more accessible for disabled learners.<br>Know the rules of digital copyright and alternatives such as Creative Commons. |
## Digital creation, problem solving and innovation (creative production)

### Digital creation
Maps to UKPSF: A2

- Edit, remix and repurpose digital media to meet learning needs. Design and create digital materials to meet learning needs.
- Produce digital materials – text, images, video, audio, digital presentations, podcasts and screencasts, blog and web posts – to communicate curriculum content.
- Design digital tests, quizzes and assessment tasks.
- Design digital activities for different learning and teaching contexts.

**At higher levels:**
- Design interactive digital materials eg learning apps and applications, educational games and animations, virtual environments and interfaces, interactive tutorials.
- Design courses of study that embed digital capabilities and/or include digital issues as subject matter.

### Digital research and problem solving
Maps to UKPSF: K2, K5, V3

- Collect, understand and use evaluation data from teaching/learning eg using online surveys, data capture tools, video and audio recording, social and sharing media, qualitative and quantitative data analysis tools, data visualisation.
- Use the outcomes of digital scholarship (eg open data, data visualisations, infographics, e-journals) as resources for learning and teaching.

**At higher levels:**
- Evaluate new digital approaches to learning and teaching; investigate issues in digital learning; present or publish in open/digital formats.
- Support critical thinking about the role of digital technologies in teaching/learning and in specific subject areas.

### Digital innovation
Maps to UKPSF: K5, V3

- Investigate and implement new digital approaches to learning, teaching and assessment.
- Identify problems and challenges in digital learning, and explore solutions.

**At higher levels:**
- Develop and share new practices with digital technology in learning, teaching and assessment; lead organisational change projects; lead departments and teams in new initiatives in response to digital challenges and opportunities.

## Digital communication, collaboration and participation (participating)

### Digital communication
Maps to UKPSF: K4, V1

- Use digital communications to support learning eg through webinars, tutorials, mentoring, online lectures, email, chat.
- Offer feedback to learners in ways that are digitally available.
- Communicate ideas in a range of digital media and in accordance with different cultural, social and communication norms.
- Consider the communication and access needs of different learners.
- Support learners to communicate effectively in academic and professional contexts and to understand the different norms of communication in different settings.
- Respect others in public communications; maintain privacy in private communications; model this to learners.

### Digital collaboration

- Participate in digital teams and working groups eg around curriculum development and review.
- Collaborate effectively in digital spaces eg building shared resources, wikis, web pages, digital writing and presentations.
- Support learners to collaborate using shared digital tools and media, and to work effectively across cultural, social and linguistic boundaries.

### Digital participation

- Participate in digital networks with learners and with other teachers. Participate actively in social media relevant to your professional role and interests eg Facebook, Twitter, LinkedIn.
- Share learning and teaching materials, presentations, resources etc on appropriate digital sites and networks.
- Facilitate learning groups and networks; encourage learners to do the same.
- Behave safely and ethically in networking situations; encourage learners to do the same.

**At higher levels:**
- Facilitate and build new networks; amplify messages across networks; be aware of how digital networks influence social behaviour.

<td><strong>Digital identity and wellbeing (self-actualising)</strong></td>
<td></td>
</tr>
<tr>
<td><strong>Digital identity</strong>&lt;br&gt;Maps to UKPSF: V1</td>
<td>Develop and project a positive digital identity or identities as an educator and manage digital reputation across a range of platforms. Maintain a range of digital profiles and other identity assets such as a professional development record. Support learners to manage their digital identity and reputation. Collate and curate professional materials (eg learning and teaching materials) across digital networks. At higher levels: Publish or share open materials relevant to learning and teaching, contribute to building the digital reputation of the organisation, monitor impact across digital networks.</td>
</tr>
<tr>
<td><strong>Digital wellbeing</strong>&lt;br&gt;Maps to UKPSF: A5, V2, V4</td>
<td>Look after personal health, safety, relationships and work-life balance in the digital organisation: model this to learners. Act with respect for the health of others and of the natural environment when using digital technologies: model this to learners. Participate in digital safety and cyber-bullying initiatives; address digital responsibility with learners, and the consequences of negative online behaviours. Ensure equality of access to digital opportunity; use digital technologies to support access and inclusion. Balance digital with real-world interactions appropriately to support learning and teaching relationships.</td>
