Jisc transitional agreements oversight group
Summary of the 5th meeting on 02/11/21

Ahead of the meeting with representatives from Taylor & Francis, the group received a recap of the current agreement and discussed questions to be asked.

Representatives from Taylor & Francis joined the meeting, and an open discussion took place between group members and the representatives about the UK agreement, progress and barriers overseas and T&F’s vision for the future including its F1000 platform. There was broad agreement that it would be useful to continue these discussions.

The group were provided with a discussion paper which proposed a series of metrics to evaluate and monitor the performance of TAs. Jisc’s proposal for a TA dashboard will continue to be developed and will consider the group’s comments.

Jisc proposed that the work carried out by the group at the last meeting around potential future negotiations scenarios should be developed into a thought piece and this was endorsed by the group.
