Wiley’s response to the sector’s draft transparency requirements was shared. Following the meeting between the group and Wiley representatives on 10/05/21, Wiley had provided information to Jisc in preparation for this meeting, addressing questions and points raised by the group.

Jisc presented on the draft strategic objectives for the UUK/Jisc content negotiation strategy group (CNSG). The group considered how they would define and monitor their own activity to allow it to inform workplans and targets for the CNSG. The group discussed how they would feed back on key concepts and provide the data that was required by the CNSG. This approach would support the move towards open research and innovative approaches.

The group discussed their transparency requirements, including the rationale for these and how they might be used to design future agreements.
