Green Open Access (Route 2)

Perhaps the quickest and easiest way for a publisher to ensure compliance with UKRI’s Open Access Policy is through self-archiving or Green open access (referred to as Route 2 in the UKRI policy). This is where the author archives a version of their article in a repository that meets UKRI’s requirements.

**What?**
Author Accepted Manuscript*, or Version of Record**

**Where?**
Institutional or subject repository, under CC BY licence

**When?**
On acceptance, or no later than first online publication

*The Author Accepted Manuscript (also known as the ‘postprint’) is the version of the work that has been accepted by the journal following peer review and includes all amendments made during that process, but which has not yet been branded, typeset, or copyedited by the publisher in any way.

**The Version of Record is the final published version as published in the journal or on the publisher’s platform.

How to facilitate Route 2 compliance:

- Publicise your self-archiving policy on your webpages (see below)
- Update Sherpa (New to Sherpa? See our guide)

To advertise your funder compliance to potential authors you should include the following text on the relevant pages of your website.

We comply fully with the open access requirements of UKRI, Wellcome, and NIHR. Where required by their funder, authors retain the right to distribute their author accepted manuscript (AAM), such as via an institutional and/or subject repository (e.g. arXiv or EuropePMC), under a Creative Commons Attribution 4.0 International (CC BY 4.0) licence for release no later than the date of first online publication.

We also strongly recommend that you add this text to your licence to publish or equivalent author agreement.

60+ publishers of all shapes and sizes that have implemented UKRI compliant self-archiving/Green OA policies.
