The student digital experience tracker is a new national survey to find out more about how you and your fellow learners use technology and how this affects your learning. We are running the tracker now because we know that digital issues are important for everyone who learns and teaches here. The tracker will allow us to:

» Find out how you would like technology to be used in learning and teaching
» Understand how you use our digital environment and services and how we could improve them
» Target resources towards the issues that matter to you
» Start a conversation with you about your digital skills, expectations and experiences

Your views on digital count: participate in our student digital experience tracker survey: insert survey URL
